

Bodycad announces US FDA 510k clearance for BC Fine Osteotomy™

April 12, 2020

Bodycad was granted FDA 510(k) clearance for the BC Fine Osteotomy™ system, the first personalized planning and plating system for osteotomies around the knee.

BC Fine Osteotomy™ is synonymous with our highly accurate Bodycad proprietary software, offering a complete solution adapted to each unique patient. It includes a 3D printed patient-specific surgical guide (approved by the surgeon) and a patient specific plate with a small titanium wedge to confirm the 3D angular correction. The BC Fine Osteotomy™ system includes calibrated drill guides with positive stops to protect posterior neurovascular structures, multi-planar 3D planning to increase accuracy and is delivered as a procedure in a box to drive efficiency in the OR.
